Dear Chair Feinstein, Vice-Chair Chambliss, Chair Rogers, and Ranking Member Ruppersberger,

We are writing to urge you to preserve the existing statutory requirement for the Intelligence Community to prepare an annual report to Congress regarding security clearances.

That requirement, which was enacted in the FY2010 Intelligence Authorization Act (50 U.S.C. 415A-10), would be repealed by the Senate Committee markup of the FY2013 Intelligence Authorization Act (S.3454, Section 308(a)(3)). The House Committee markup leaves the reporting requirement unaffected.

We believe the annual report on security clearances provides exceptional value to the public and should continue to be published.

In the two years that the report has been produced, it has dramatically altered our conception of the size and scale of the personnel security clearance system. Prior to the reporting requirement, the Government Accountability Office could only estimate the number of security cleared personnel, and its latest estimate was low by more than a million clearances.

As evidence of the exceptional public interest in this report, we note that the findings of the latest annual report have appeared in the New York Times (July 24), the Washington Post (July 28), and McClatchy Papers (July 27), among others. As you know, this level of attention is well above average for a report to Congress on any topic.

Through this annual reporting requirement, your Committees have provided an unprecedented degree of transparency concerning the security clearance system. We thank you for that, and we respectfully request that you maintain this important reporting requirement.

Sincerely,

American-Arab Anti-Discrimination Committee
